Thermador® Exclusive

FEATURES

BUILT-IN COFFEE MACHINE

Automatic Cleaning

Cleanup has never been easier. Using both hot water and steam, the machine features a fully automatic rinse program at turn-on and turn-off, so it's always ready for the next fresh-tasting pour.

LCD Display

Easy to navigate full color LCD display not only lets you customize your cup but also get your favorite cup in a few easy steps.

Installation Options

Plumbed

With an option for built-in drainage instead of a water tank, Thermador plumbed Built-in Coffee Machines help ensure your machine is ready when you are for your next cup. A water and drain connection eliminate the need to empty a drip tray, while water replenishment flows water directly into your machine from your plumbed water source, eliminating the need to fill a water container.

Non-Plumbed

Thermador non-plumbed Built-in Coffee Machines can be installed without an additional water line in your home—enabling installation in the bedroom, guest room, office and beyond.
